**NEW: Latisse™ Eyelash Extension** Longer, fuller lashes in 4-8 weeks? "Yes! Dr. Levens asked several of us to try this product before he prescribed it for patients," says Deirdre Fields, Director, Levens Skin Rejuvenation Clinic. "It absolutely works." [Read article.](#)

**CASE STUDY: Tummy Tuck** A year after Joan P\*, 57, of Orlando had her tummy tuck, she says she still loves "looking at myself in the mirror...my stomach wasn't this flat as a teenager. "I'm only 4'11" and I had two large babies 30 years ago," she adds. "My belly became very stretched and has bulged ever since. I decided I finally deserved to do something about it. I lost a pant size and everything is so much more comfortable. It's just so great to be able to look down and not see that awful bulge."

**CASE STUDY: Breast Augmentation & Lift** "I've always had the chest of a 10-year-old," laughs Debbie R\*, 35, of Parkland, "except when I was nursing my daughter for 9 months.

I went from flat to large then, but afterwards I was flat again...plus droopy and noticeably asymmetrical. Nothing ever fit right and I had no self-confidence about my figure," she adds. "After my divorce, I wanted a new look that would help me feel more confident in work and social situations. My breast augmentation and lift did the job!" [Read article](#)

**CASE STUDY: Nose Reshaping** High school teacher Elisa DeCarlo, 30, Coral Springs,

doesn't avoid having her picture taken anymore. "The bump in the middle of my nose wasn't that noticeable when I looked in the mirror head-on, so it didn't bother me most of the time. But whenever a photo captured my profile, I'd be reminded how unattractive that bump was. When I was 24, I decided to permanently change my profile." [Read article](#)

**GOOD (Lipo) NEWS! VASER Liposelection® and VASER HiDef™** Dr. Levens is now utilizing the new technology of VASER Liposelection® and VASER HiDef™, a technique that uses ultrasonic energy delivered into the fatty tissue through a thin probe to target and emulsify fat. "We're seeing excellent results for patients," Dr. Levens says, "and the procedures can be used to remove excess fat on arms, hips, chest, breasts, knees, ankles, waist, stomach, chin, back, buttocks, neck and thighs. There is less blood loss, greater surgical accuracy, and faster healing." [Read article](#) [Call me for a free consultation](#)

**Le Mystère No.9 Available—at a Discount!** Now available at Dr. Levens' office, Le Mystère No.9, designer bras designed to complement the unique changes in shape and size that occur after a breast augmentation. "We started carrying these amazing bras as a convenience for patients with implants because it can be difficult to find a bra that fits well after an augmentation," says Office Manager Linda Keyes. "But they're so gorgeous and comfortable, many other patients are also buying them." [Read article](#)
